

# Test & Validation Engineering Yearlong Intern

## Your tasks

We are seeking a Test & Validation Engineering Intern to support hands on lab, workshop, vehicle, and build operations for automotive radar validation activities across DV/PV programs. This role will assist with lab documentation, vehicle readiness, harness and test build support, fixture and tooling organization, bench setup support, and supervised validation test activities. The intern will work closely with engineers, technicians, lab personnel, and project teams to help maintain organized workspaces, support test readiness, track equipment and assets, and improve execution readiness for active validation campaigns.

## Key Responsibilities

- Provide supervised support for vehicle testing, validation test execution, vehicle based checks, and recording of test related observations as directed by the engineering team.
- Support environmental test bench setup and teardown activities in the validation lab, including basic equipment movement, setup organization, asset tracking, and readiness checks.
- Help maintain test fixture, bracket, tooling, harness, plug in, and lab asset inventory records to support ongoing DV/PV execution and cross site test readiness.
- Support test trailer, vehicle, and lab area organization, cleanup, and readiness activities to maintain a safe and efficient validation work environment.
- Support hands on lab and workshop operations for radar sensor design validation and product validation test programs, including preparation, organization, and readiness activities for active test campaigns.
- Generate, file, and maintain workshop and lab documentation including schematics, layouts, procedures, processes, reports, and supporting validation records.
- Maintain organization of lab equipment, cabinets, drawers, storage areas, fixtures, brackets, tooling, and lab consumables to support traceability and readiness.
- Support test vehicle readiness activities including vehicle inspections, vehicle logistics checklists, parts pickup, parts running for maintenance, vehicle service coordination, vehicle pickup and drop off, and vehicle detailing.
- Assist with wiring harness builds, test vehicle builds, test setup preparation, and related mechanical or electrical build activities under engineer or technician supervision.

## Your profile

### WHAT YOU BRING TO THE ROLE

- Currently pursuing a Bachelor's degree in Electrical Engineering, Computer Engineering, Mechanical Engineering, Automotive

Job ID

**REF10038V**

Field of work

**Research and Development**

Location

**Auburn Hills**

Legal Entity

**AUMOVIO Autonomous Mobility  
US, LLC**

Engineering, Mechatronics, or a related engineering field.

- Comfortable with hands on mechanical and electrical work, including basic hand tools, wiring, lab equipment, vehicle support, and test setup activities.
- Basic understanding of electrical schematics, automotive electronic products, validation testing, lab documentation, or vehicle systems.
- Strong organizational skills and attention to detail, with the ability to maintain accurate documentation, equipment records, and readiness trackers.
- Valid driver's license for vehicle logistics, service support, and pickup or drop off activities, where required.
- Good communication skills with internal team members, engineers, technicians, lab personnel, and suppliers.
- Since this is a yearlong internship, you must be enrolled in a program for the duration of the internship.
- Must have and maintain a minimum GPA of 3.0
- Minimum Sophomore standing or higher
- Must be able to work on site during normal business hours (Mon-Fri)
- AUMOVIO will not sponsor individuals for employment visas now or in the future for this job.
- AUMOVIO does not offer relocation assistance for this opportunity.

### **Additional Ways To Stand Out**

- Experience with vehicle maintenance support, wiring harness work, mechanical assembly, shop tools, lab organization, or test equipment setup.
- Familiarity with Microsoft Excel, SharePoint, Teams, PowerPoint, or structured documentation tools.
- Exposure to automotive radar, vehicle testing, bench testing, validation labs, environmental test setups, or test fixture preparation.
- Interest in automotive validation, vehicle integration, lab operations, build support, and hands on engineering execution.

### **Our offer**

EEO-Statement:

EEO / AA / Disabled / Protected Veteran Employer. AUMOVIO offers equal employment opportunities to all qualified individuals, without regard to unlawful consideration to race, color, sex, sexual orientation, gender identity, age, religion, national origin, disability, veteran status, or any other status protected by applicable law. In addition, as a federal contractor, AUMOVIO complies with government regulations, where they apply, including affirmative action responsibilities for qualified individuals with a disability and protected veterans. To be considered, you must apply for a specific position for which AUMOVIO has a current posted job opening. Qualifying applications will be considered only for the specific opening(s) to which you apply. If you would like to be considered for additional or future job openings, we encourage you to reapply for other opportunities as they become available. Further, AUMOVIO provides reasonable accommodations to qualified individuals with a disability.

## About us

Since its spin-off in September 2025 AUMOVIO continues the business of the former Continental group sector Automotive as an independent company. The technology and electronics company offers a wide-ranging portfolio that makes mobility safe, exciting, connected, and autonomous. This includes sensor solutions, displays, braking and comfort systems as well as comprehensive expertise in software, architecture platforms, and assistance systems for software-defined vehicles. In the fiscal year 2024 the business areas, which now belong to AUMOVIO, generated sales of 19.6 billion Euro. The company is headquartered in Frankfurt, Germany and has about 87.000 employees in more than 100 locations worldwide.
