

Industrialization Engineer (m/f/d) - Process Development

Ihre Aufgaben

As an Industrialization Engineer responsible for the process development, you will design, develop and implement equipment for electronics manufacturing, ensuring process capability and quality performance from project launch through serial production stabilization.

Key Responsibilities

- Participates in industrialization meetings, orders equipment, creates technical documentation, coordinates installations, monitors performance, and hands over processes to the serial production team;
- Ensures process capability and achievement of quality targets during product launch and ramp-up phases;
- Maintains and develops technical know-how and ensures compliance with relevant procedures and standards;
- Provides support in crisis situations and prepares quotations for new projects;
- Supports the introduction of new technologies, Design for Manufacturing (DFM) activities, and technical problem-solving;
- Supports new product introductions (NPI), design and process reviews, and strategic projects;
- Maintains relationships with technology partners and ensures transparency of technical information;
- Develops technology roadmaps, monitors market trends, and evaluates new technologies and products;
- Prepares for and participates in internal and external audits.

Ihr Profil

- **Education:** Bachelor's Degree in Electrical Engineering, Electromechanics, Automation Engineering, or Mechatronics
- **Experience:** Minimum 3 years of experience in process system development
- **Languages:** Romanian and Advanced English skills
- **Travel:** 10-25% business travel required

Technical skills required:

- Industrial robot programming knowledge;
- Pneumatics, electronics, and mechanics knowledge;
- PLC programming (Siemens, Beckhoff) skills;
- Technical drawing skills;
- CATIA and SolidWorks knowledge;
- Mechanical design knowledge;
- Project management skills;
- Machine and equipment safety design.

Über uns

Since its spin-off in September 2025 AUMOVIO continues the business of the former Continental group sector Automotive as an independent company. The technology and electronics company offers a wide-

ranging portfolio that makes mobility safe, exciting, connected, and autonomous. This includes sensor solutions, displays, braking and comfort systems as well as comprehensive expertise in software, architecture platforms, and assistance systems for software-defined vehicles. In the fiscal year 2024 the business areas, which now belong to AUMOVIO, generated sales of 19.6 billion Euro. The company is headquartered in Frankfurt, Germany and has about 87.000 employees in more than 100 locations worldwide.
