

High Voltage Senior Product Technical Manager 资深高压产品技术经理（芜湖）

Vos activités

1. Define and maintain the technical product concept, requirements baseline, interfaces and development scope for high-voltage products
2. Translate customer and portfolio requirements into feasible engineering targets, technical work packages and product deliverables
3. Align technical assumptions, constraints, risks and open points with project management, product management and discipline leads
4. Support platform reuse, variant and technology decisions with technical feasibility and impact assessments
5. Ensure technical planning is consistent with product lifecycle gates, quality targets, timing, cost and resource constraints
6. Lead technical alignment across system, hardware, software, mechanical, thermal, safety, validation, quality and manufacturing disciplines
7. Balance customer-specific needs with platform strategy, standardization, manufacturability and long-term product competitiveness

A propos de nous

Since its spin-off in September 2025 AUMOVIO continues the business of the former Continental group sector Automotive as an independent company. The technology and electronics company offers a wide-ranging portfolio that makes mobility safe, exciting, connected, and autonomous. This includes sensor solutions, displays, braking and comfort systems as well as comprehensive expertise in software, architecture platforms, and assistance systems for software-defined vehicles. In the fiscal year 2024 the business areas, which now belong to AUMOVIO, generated sales of 19.6 billion Euro. The company is headquartered in Frankfurt, Germany and has about 87.000 employees in more than 100 locations worldwide.
