

Wireless Engineer Intern (RF & Network) [IDA:00037]

Náplň práce

- Be part of the research and design for automotive products such as Physical layer design, simulation and testing for wireless communication in high-end vehicles (Measurement, Testing, Analysis, Diagnosis).
- Work alongside Wireless RF Engineers in R&D for Wireless Communications for Automotive Vehicles to support design and development.
- Technical Management & Maintenance of wireless signals and frequency waves for a smooth operation of equipment and wireless products.
- Be introduced to and self-learn to use various RF & wireless equipment to develop technical & lab management skills (identifying, tracking and itemising wireless equipment and consumables).

Profil kandidáta

- Needed Experience in Wireless Product development and technical theory
- Needed Experience in ADS, MATLAB, PYTHON
- Needed Knowledge of use of RF Spectrum Analyser, RF Network Analyser, RF Signal Generator, RF Pattern Generator

Čo ponúkame

Ready to take your career to the next level? The future of mobility isn't just anyone's job. Make it yours! **Join AUMOVIO. Own What's Next.**

O nás

Since its spin-off in September 2025 AUMOVIO continues the business of the former Continental group sector Automotive as an independent company. The technology and electronics company offers a wide-ranging portfolio that makes mobility safe, exciting, connected, and autonomous. This includes sensor solutions, displays, braking and comfort systems as well as comprehensive expertise in software, architecture platforms, and assistance systems for software-defined vehicles. In the fiscal year 2024 the business areas, which now belong to AUMOVIO, generated sales of 19.6 billion Euro. The company is headquartered in Frankfurt, Germany and has about 87.000 employees in more than 100 locations worldwide.
