

Information Security Advisor

あなたの仕事内容

OVERVIEW

The Local Information Security Advisor (ISA) has the task to establish and drive Information Security (InfoSec) according to all relevant policies and guidelines on behalf of the InfoSec Officer (ISO) and the Regional InfoSec Manager (ISM).

By that the ISA has an essential role in the Information Security Management System (ISMS).

The Location Management commits itself to the InfoSec guidelines and targets and actively supports the InfoSec organization by appointing a ISA.

The ISA:

- Works in close cooperation with all relevant local departments as well as with the Regional Security Manager (ISM).
- Participates regularly in local management meetings.
- Participates annually in a regional InfoSec Workshop organized by the ISM.
- Supports all related local projects in order to ensure InfoSec conformity.
- In the event of substantial deficiencies or severe incidents endangering the security of company information, the ISA must inform and escalate accordingly to relevant policies.

Responsibilities on local level:

Support responsible management in the appointed location(s):

- Drive and monitor the implementation and usage of the existing ISMS (Information Security Management System) according to policies and guidelines as well as to business and customer requirements (e.g. ISO 27001, 8th European Directive, BSI).
- Conduct and ensure regular trainings, provision of information and advice of all employees, managers and third parties.
- Drive the appropriate classification of company proprietary information and adequate handling.
- Conduct or support risk management activities (i.e. risk assessments, business impact analysis).
- Monitor the development and maintenance of local emergency- and contingency plans.
- Advise in all local aspects of identity- and authorization management.
- Drive secure collaboration and integration of business partners.
- Drive, track, and report detection and remediation of vulnerabilities.
- Monitor and control the effectiveness of InfoSec projects and implemented measures.
- Drive usage of InfoSec processes and tools including documentation.
