

Display CPM 显示屏项目管理（南京/芜湖）

Your tasks

1 Technical

1. Deep understanding of display principle & technology and related optical performance
2. Know how for touch panel principle & technology
3. Know how for Optical bonding
4. Knowledge in display driving electronics, display interface, analogue/digital electronics and microprocessor
5. Develop new display / touch panel technologies in preparation for application in future automotive products

2 Requirements development

1. Analyse and translates customer requirements into display requirements
2. Defines and conducts reviews on display concepts based on customer requirement & internal requirement which inputs from other disciplines

3 Project development

1. Develop displays in automotive products (instrument cluster, display solutions, HUD)
2. Defines, aligns and tracks display development milestones / schedule according to product schedule together with PM and TPL
3. Project lead of display development for delivery to customer
4. Development include concept creation, architecture design, deviation review and negotiation with supplier, design review, performance evaluation/optimization, specification creation and engineering release (consolidates inputs from other disciplines)
5. Follow both project implementation and quality management rules in realization of display

4. Supplier management

1. Manage suppliers and act as interface to supplier for all technical topics
2. Keep close communication with suppliers to get new technology application, low cost solution and potential profitable solution investigation
3. Support component PPAP preparation , function ISIR approval
4. Support SQM for display quality issue and improvement
5. Supplier PCN / PTN activities

5. Problem solving

1. Support issues which are related to display
2. Take leading failure analysis and problem solving on LCD issues

About us

Since its spin-off in September 2025 AUMOVIO continues the business of the former Continental group sector Automotive as an independent company. The technology and electronics company offers a wide-ranging portfolio that makes mobility safe, exciting, connected, and autonomous. This includes sensor solutions, displays, braking and comfort systems as well as comprehensive expertise in software, architecture platforms, and assistance systems for software-defined vehicles. In the fiscal year 2024 the business areas, which now belong to AUMOVIO, generated sales of 19.6 billion Euro. The company is

headquartered in Frankfurt, Germany and has about 87.000 employees in more than 100 locations worldwide.
