

SAP Consultant SCM APO Demand Planning (Techno-Functional)

Descrição da função

The group Planning (specifically PL-DP) within the Automotive IT Competence Center - Business Applications (IT BA) is responsible in the process areas of master data maintenance, sales and operations planning. We are currently looking for a techno-functional consultant with focus on supply chain planning with APO DP.

- Possess an understanding of the demand planning and sales operations planning processes. Strong skills in translating business needs into functional and technical specifications.
- Must have a deep knowledge of the system landscape and standard interface integration with a SAP APO Demand Planning solution.
- Conduct system analysis and provide relevant APO DP system configuration (customizing) according to business requirements.
- Provides functional and technical support and implement solutions. Provide support of SAP-systems to investigate, monitor, and resolve incident and/or change management requests. Define and create authorization concepts and roles in SAP.
- Design and develop ABAP programming requirements within the functional modules of APO DP. Familiarity with development of SAP APO macros, ABAP basics.
- SAP APO DP Configuration: Deep understanding of Demand Planning functionalities, including planning books, data views, macros, and key figures.
- SAP BW/BI Integration: Experience in the development of data extraction, transformation, and loading (ETL) between SAP BW and APO.
- SAP CIF (Core Interface): Knowledge of integration between SAP ECC and APO.
- Data Modeling & Management: Ability to manage master and transactional data relevant to planning
- In-depth analysis and debugging of existing programs, interfaces.
- Understanding of project management frameworks used in SAP implementations.

Quem somos

Since its spin-off in September 2025 AUMOVIO continues the business of the former Continental group sector Automotive as an independent company. The technology and electronics company offers a wide-ranging portfolio that makes mobility safe, exciting, connected, and autonomous. This includes sensor solutions, displays, braking and comfort systems as well as comprehensive expertise in software, architecture platforms, and assistance systems for software-defined vehicles. In the fiscal year 2024 the business areas, which now belong to AUMOVIO, generated sales of 19.6 billion Euro. The company is headquartered in Frankfurt, Germany and has about 87.000 employees in more than 100 locations worldwide.
