

DevOps Technical Support Intern

Your tasks

Your future team

You will join our Platform Services team, where our goal is to provide the high performance compute and storage capacity for our product teams, who are working on AI-based solutions for the automotive industry.

About the Role

As part of our team, you'll help ensure the smooth operation of our on-premises High Performance Computing (HPC) cluster, built on a modern hardware and software stack. Your responsibilities will include:

- Monitoring and troubleshooting technical issues that could impact the stability or performance of our services
- Supporting users by handling incidents and resolving problems through our established processes
- Collaborating with vendors and service providers, both internal and external, to maintain and improve our infrastructure
- Taking part in the development of our services with the help of our senior Colleagues

Your profile

We're looking for someone who:

- Has been enrolled in a Hungarian university (BSc or MSc) in a technical field such as Computer Science, Electronics, or Electrical Engineering for at least 6 months
- Has at least B2-level proficiency in English
- Is collaborative, open-minded, and enjoys working in a team
- Is curious about cutting-edge technologies and industry best practices
- Learns quickly and can manage tasks independently

These skills will help you stand out:

- Solid understanding of Linux-based systems and basic system administration
- Understanding of core networking concepts (e.g. TCP/IP, OSI model)
- Familiarity with virtualization and containerization technologies (e.g. Docker)
- Knowledge of fundamental cybersecurity concepts and best practices
- Ability to write small scripts or programs for automation (Linux shell scripting and Python are a plus)
- Awareness of infrastructure-as-code (IaC) tools and concepts (e.g., Ansible, Terraform)
- Basic understanding of how machine learning solutions are developed, including their typical lifecycle (e.g., data preparation, model training)

Job ID
REF3040K

Information Technology

Location
Budapest

Legal Entity
**Continental Autonomous
Mobility Hungary Kft.**

Our offer

What We Offer

- A supportive and inspiring local team, with opportunities to collaborate across our international development network;
- A dynamic and inclusive work environment where you'll be supported in taking on impactful tasks as you develop your skills;
- A dedicated mentoring program, giving you direct access to experienced colleagues and hands-on guidance in a collaborative team setting;
- A new and modern office in the heart of Budapest (near Calvin square).

Ready to take your career to the next level? The future of mobility isn't just anyone's job. Make it yours! **Join AUMOVIO. Own What's Next.**

About us

Since its spin-off in September 2025 AUMOVIO continues the business of the former Continental group sector Automotive as an independent company. The technology and electronics company offers a wide-ranging portfolio that makes mobility safe, exciting, connected, and autonomous. This includes sensor solutions, displays, braking and comfort systems as well as comprehensive expertise in software, architecture platforms, and assistance systems for software-defined vehicles. In the fiscal year 2024 the business areas, which now belong to AUMOVIO, generated sales of 19.6 billion Euro. The company is headquartered in Frankfurt, Germany and has about 87.000 employees in more than 100 locations worldwide.
