

IT Applications Specialist for Atlassian Jira & Confluence

Vaše náplň práce

We are seeking a highly skilled and proactive IT Applications Specialist to join our dynamic IT team. As an IT Applications Specialist, you will be responsible for the administration and management of critical Engineering Applications, especially for Atlassian tools like Jira and Confluence.

The ideal candidate should have a strong understanding of the Agile framework, Scrum/Kanban, Lean principles, and ITIL practices. Additionally, basic programming knowledge will be essential to support tool customization and automation efforts.

Key Responsibilities:

- Administer, configure, and maintain Atlassian Jira and Confluence instances to meet the organization's software development and project management requirements, especially in the context of Agile SW development
- Develop, roll out and maintain solutions for Atlassian Jira and Confluence to allow our Engineering applications to be operated in the most effective and performant way
- Develop, roll out and maintain architectures following the A IT EA and Conti standards for Service and Application Architecture
- Customize and extend tool functionalities using basic programming skills to align with specific project needs
- Support integrations between various IT applications and tools, enabling seamless data flow and effective automation
- Monitor system performance, identify, troubleshoot issues, and apply necessary updates and patches to ensure optimal tool functionality
- Apply Agile methodologies, Scrum practices, Lean principles, and ITIL processes to foster effective software development practices
- Actively participate in IT projects, related IT Services, providing technical expertise, and promoting adherence to Agile and Scrum principles
- Provide excellent technical support to end-users, assisting with tool-related inquiries and troubleshooting application-related issues promptly.

Váš profil

Bachelor's degree in Computer Science, Information Technology, or a related field (or equivalent work experience)

- Good English language skills spoken and written (German is a plus)
- Experience in administering Atlassian Jira and Confluence
- Solid understanding of Agile methodologies, Scrum practices, and Lean principles
- Familiarity with ITIL practices and their application in IT project management

O nás

Continental's Automotive group sector is expected to be listed as independent company "AUMOVIO" in September 2025. With ~93,000 employees worldwide and annual sales of ~€20 billion, we are entering an exciting new era.

AUMOVIO stands for highly developed electronic products and modern mobility solutions. In addition to its strong market position with innovative sensor solutions, displays, and technologically leading braking and comfort systems, AUMOVIO has significant expertise in software, architecture platforms and assistance systems for the rapidly growing future market of software-defined and autonomous vehicles. Our purpose is clear: to make future mobility safe, exciting, connected, and autonomous.
