

SQM Engineer – Global Category Stamping

Your tasks

We are seeking a SQM Engineer – Global Category Stamping to join our team in Prai, Malaysia. In this critical role, you will be responsible for ensuring the quality of stamped components from global suppliers, driving continuous improvement, and maintaining high standards across our supply chain.

- Develop and implement supplier quality management strategies for the global stamping category
- Conduct supplier audits and assessments to ensure compliance with quality standards and specifications
- Analyze supplier performance data and implement corrective actions to address quality issues
- Collaborate with cross-functional teams to resolve supplier quality problems and drive continuous improvement
- Manage supplier relationships and communicate quality requirements effectively
- Develop and maintain quality management documentation, including procedures and reports
- Utilize statistical process control (SPC) and other quality tools to monitor and improve supplier performance
- Participate in new product development projects, ensuring supplier quality is considered from the outset
- Stay current with industry trends and best practices in supplier quality management and stamping technologies

About us

Since its spin-off in September 2025 AUMOVIO continues the business of the former Continental group sector Automotive as an independent company. The technology and electronics company offers a wide-ranging portfolio that makes mobility safe, exciting, connected, and autonomous. This includes sensor solutions, displays, braking and comfort systems as well as comprehensive expertise in software, architecture platforms, and assistance systems for software-defined vehicles. In the fiscal year 2024 the business areas, which now belong to AUMOVIO, generated sales of 19.6 billion Euro. The company is headquartered in Frankfurt, Germany and has about 87.000 employees in more than 100 locations worldwide.
