

IE Process Technician

Náplň práce

Ensure that process systems deployed in production floor meet target KPIs (Availability, Quality Rate, Performance) after G90 and during remainder of PLC. Support and promoting continuous improvement for process operation

- Responsible to support to engineering team on Introduction of highly complex production technologies according to CAP0603076 and other specific procedures of Aumovio Automotive.

-Support to manage, sustain and optimize process equipment through continuous improvements (Software and Hardware, improving overall KPIs-such as PFY, utilization rate, PpK/Cpk, cycle times,failures of 0 kms etc.)

-Support to ensure process systems deployed in production floor meet target KPIs (Availability, Quality Rate, Performance) after G90 and during remainder of PLC. Lead and promote continuous improvement efforts for factory operation. Provide feedback to process engineering team regarding lessons learned and best practices.

-Support Yokoten efforts by appropriately documenting lessons learned and best practices, and by mentoring less-experienced colleagues.

-Support TPM team, supervising and audit proper preventive and corrective maintenance of systems.

- Execute middle and engineering changes, modification of testplans for variant/part number introduction.

- Support in process systems documentation based on assigned technologies. Audit and supervising sustaining documentation.

- Contribute 100% to the strategies established for the plant (for example, 5s, CIM, Strategic Projects, etc.) and that are applied to the position.

-Optimize production technologies in terms of quality, time and cost.

Execute work-related tasks and activities requested / assigned by the leader in charge.

- Support for administrative tasks assigned.
- Maintain and control the proper use of the assigned tool
- Provide technical support to other departments related process activities
- Support Engineering groups in redesign and improvement of equipment
- Evaluate and appport to modify operating procedures and operation instructions

Ready to take your career to the next level? The future of mobility isn't just anyone's job. Make it yours! **Join AUMOVIO. Own What's Next.**

O nás

Since its spin-off in September 2025 AUMOVIO continues the business of the former Continental group sector Automotive as an independent company. The technology and electronics company offers a wide-ranging portfolio that makes mobility safe, exciting, connected, and autonomous. This includes sensor solutions, displays, braking and comfort systems as well as comprehensive expertise in software, architecture platforms, and assistance systems for software-defined vehicles. In the fiscal year 2024 the business areas, which now belong to AUMOVIO, generated sales of 19.6 billion Euro. The company is

headquartered in Frankfurt, Germany and has about 87.000 employees in more than 100 locations worldwide.
