

Test Management Engineer or Analyst

Your tasks

We are seeking a highly motivated professional to lead and oversee all testing activities within automotive system projects. This role is critical in ensuring the quality and readiness of systems for release, providing a well-founded **release recommendation** based on comprehensive test results.

Key Responsibilities:

- Develop and implement a **project-specific test strategy** aligned with customer requirements.
- Create and manage detailed **test plans**, defining activities, timelines, and resources.
- Coordinate and monitor **system integration** and **release testing** processes.
- Support the **prototype ordering process** for release validation.
- Act as the main point of contact for **customer communication** regarding testing.
- Review test results, manage deviations, and ensure timely resolution of action items.
- Establish and support **customer-specific testing procedures**.
- Deliver clear and data-driven **release recommendations**.

Your profile

What We're Looking For:

- Strong background in **Automotive Systems Validation**.
- Excellent organizational and communication skills.
- Ability to work collaboratively across multidisciplinary teams.
- Advanced level of **English** (written and spoken).
- Bachelor's degree in Engineering, Computer Science, or a related field (completed or in progress).
