

RF Antenna Design Engineer

Your tasks

We are seeking a talented RF Antenna Design Engineer to join our team in Santa Anita, Mexico. In this role, you will be responsible for defining, developing, implementing and optimizing RF antennas concepts and solutions for various wireless communication applications. You will work closely with cross-functional teams to create innovative antenna solutions that meet our clients' performance requirements.

- Responsibility to implement and verify antenna solutions in application, including automotive environment.
- Verification/benchmark of competitor products for internal/external antenna solutions.
- Setup of new measurement equipment for future requirements and for innovative products.
- Self-driven execution of simulation for performance prediction of complex antenna systems including multifunctional and multiband antennas while using self-written program packages (e.g. based on Mat lab, or C++,...) or commercial available electromagnetic field simulation program packages based on FEM, FDTD, MoM or hybrid methods.
- Interdisciplinary alignment on the concept and price with stakeholders.
- Alignment and cooperation with the WW development RF team.
- Self-driven execution of antenna measurements of complex antenna systems including multifunctional and multiband antennas and comparison of measurement results to expectations.
- Listing of deviations between simulation and measurements and definition and implementation of countermeasures to recover deviations.
- Check suitability of simulation program packages for antenna development and electromagnetic field analysis for our products and make proposals.
- Propose and foster innovations.
- Check suitability of new technologies for our products.
- Presentation of results in front of internal and external customers.
- Documentation of results using available tools.

Job ID
REF4458H

Field of work
Engineering

Location
Guadalajara - Santa Anita

Leadership level
Leading Self

Contact
Felisa Espinosa

Legal Entity
**AUMOVIO GUADALAJARA
MEXICO, S. DE R.L. DE C.V.**

Your profile

- Bachelor's Degree in electrical engineering, specialized in high frequency techniques and minimum 1 to 5 years of experience in antenna design.
- Experience in the systematical antenna design and electromagnetic field calculation.
- Extensive knowledge in the development of electrically small antennas.
- Knowledge in RF circuit design.
- Knowledge in numerical methods (MoM, FDTD, FEM, Hybrid methods).
- Extensive experience with RF program packages (FEKO, CST, HFSS, ADS, Ansoft Designer).
- Experience in antenna measurement techniques and in RF measurement techniques.
- Proficient in antenna application techniques.
- Knowledge in applications like AM-FM, DAB, RKE, PASE, TPMS, GSM/LTE/5G, GNSS, Bluetooth, UWB, SDARS, WLAN.
- Self-driven capability to work with a structured approach.
- Ability to work in a collaborative environment both locally and internationally.
- Experience in intercultural working environment.
- Languages: English (mandatory), French and German (preferred).

Our offer

We are committed to building an inclusive and discrimination-free ecosystem in Mexico, these principles are rooted in our corporate philosophy and culture. Therefore, it is totally forbidden to request a pregnancy or HIV test as part of our selection processes.

About us

Since its spin-off in September 2025 AUMOVIO continues the business of the former Continental group sector Automotive as an independent company. The technology and electronics company offers a wide-ranging portfolio that makes mobility safe, exciting, connected, and autonomous. This includes sensor solutions, displays, braking and comfort systems as well as comprehensive expertise in software, architecture platforms, and assistance systems for software-defined vehicles. In the fiscal year 2024 the business areas, which now belong to AUMOVIO, generated sales of 19.6 billion Euro. The company is headquartered in Frankfurt, Germany and has about 87.000 employees in more than 100 locations worldwide.
