

Test System Development Engineer 测试系统开发工程师（芜湖QL

Feladatok

We are seeking a detail-oriented and analytical Test System Development Engineer to join our team in Wuhu, China. In this role, you will be responsible for designing, developing, and maintaining automated test systems for our cutting-edge electronic products. The ideal candidate will combine technical expertise with efficient problem-solving skills to ensure the quality and reliability of our products.

- Design and develop automated test systems for electronic products
- Create and implement test scripts and software using programming languages such as Python, C++, or LabVIEW
- Interface with various hardware components and communication protocols
- Analyze and interpret test results, providing detailed reports and recommendations
- Troubleshoot and debug test systems to ensure optimal performance
- Collaborate with cross-functional teams to improve product quality and testing processes
- Maintain and update test documentation, including test plans and procedures
- Stay current with industry trends and emerging technologies in test system development
- Mentor junior engineers and provide technical guidance as needed

Rólunk

Since its spin-off in September 2025 AUMOVIO continues the business of the former Continental group sector Automotive as an independent company. The technology and electronics company offers a wide-ranging portfolio that makes mobility safe, exciting, connected, and autonomous. This includes sensor solutions, displays, braking and comfort systems as well as comprehensive expertise in software, architecture platforms, and assistance systems for software-defined vehicles. In the fiscal year 2024 the business areas, which now belong to AUMOVIO, generated sales of 19.6 billion Euro. The company is headquartered in Frankfurt, Germany and has about 87.000 employees in more than 100 locations worldwide.
