

Data Engineer Manufacturing Data Services

Tus actividades

The Data Engineer for Manufacturing Data Services collaborates with colleagues to develop and operate our Manufacturing Data Lake (MDL) hosted in the cloud. We manage data pipelines from the plants' MES-OLTP Oracle databases located in local data centers, performing additional data engineering tasks to provide the data in our MDL. In addition to utilizing native cloud services, we are currently exploring the implementation of a data intelligence platform to enhance our offerings. All tasks are executed in accordance with company guidelines, the SAFe @ MA roles within the agile MDL team, and under the functional leadership of the Head of Manufacturing Platform.

Principal accountabilities:

1. Works globally at the development and operations of our cloud - based Manufacturing Data Lake and Manufacturing Data Services.
2. Part of the service (DevOps) - team / SAFe-agile - team "MDL".
3. Designs and adopts new technical developments for possible optimization of the solutions
4. Develops and rolls out ongoing optimization of our implementation with respect to cost/benefit
5. Provides guidance to and share knowledge with platform users relating to the area of specialization.
6. Tests and releases software components (doing or coordinating) by using CI/CD pipelines.
7. Supports Incident Management (3rd level support) partly together with external service provider.
8. Consults our customers to enable them to use our platform (data structures, APIs, applications, etc.) in an efficient way.
9. Collaborates with IT CC's, central functions, and/or Business Areas to develop standard solutions.

Supports continuous technology market screening and optimizations of the platform.

Tu perfil

Required qualifications:

- Demonstrated experiences in AWS data service like Neptune, Athena, S3, RDS (Oracle), EC2, ECS and Lambda (Serverless)
- Demonstrated experiences in using SQL or comparable query languages
- Experiences and knowledge in relational databases
- Experiences using modern data platform principles
- Experiences in the usage of CI / CD - pipelines
- Experiences in software development (Python, Angular, C# or comparable)
- Self-dependent and team-minded

Acerca de nosotros

Since its spin-off in September 2025 AUMOVIO continues the business of the former Continental group sector Automotive as an independent company. The technology and electronics company offers a wide-ranging portfolio that makes mobility safe, exciting, connected, and autonomous. This includes sensor solutions, displays, braking and comfort systems as well as comprehensive expertise in software, architecture platforms, and assistance systems for software-defined vehicles. In the fiscal year 2024 the business areas, which now belong to AUMOVIO, generated sales of 19.6 billion Euro. The company is headquartered in Frankfurt, Germany and has about 87.000 employees in more than 100 locations worldwide.
