

Quality Engineer Intern

Your tasks

Your future team

You will work closely with the Quality Manager of the Development Center whose mission is to make sure development, management and other processes are in line with the strict automotive quality standards. You will also collaborate with several colleagues from different development groups and you will have an overview of the activities of different areas (e.g. HR, Information Security, Environmental Safety & Health).

Your task

- Keeping our Quality Management System up to date
- Creating and updating policies
- Coordinating with the process managers worldwide
- Supporting the analysis of changes in rules
- Creating and tracking tasks based on the changed rules
- Other administrative tasks

Your profile

- Ongoing studies at a Hungarian university for at least further 12 months in one of the areas: Computer Science, Electronics, Electrical Engineering, Economics
- Good command of English (Hungarian is an advantage)
- Collaborative, open-minded, team player attitude

Our offer

What we offer:

- A supportive and inspiring local team, with opportunities to collaborate across our international development network
- A dynamic and inclusive work environment where you'll be supported in taking on impactful tasks as you develop your skills
- A dedicated mentoring program, giving you direct access to experienced colleagues and hands-on guidance in a collaborative team setting
- A new and modern office in the heart of Budapest (near Calvin square)
