

Full-Stack Developer Intern [IDA: 00067]

Descrição da função

1. Collaborate with development teams to design, develop, and maintain software applications, including front-end and back-end components.
2. Perform testing and benchmarking of AI-driven security solutions.
3. Automate the generation of security test cases using AI models
4. Help configure and optimize CI/CD platform settings for fuzz testing
5. Develop scripts and automation tools to streamline manual tasks and improve efficiency
6. Utilize Git for version control, including branching, merging, and resolving code conflicts.

Requisitos

1. Proficiency in one or more programming languages such as Python, JavaScript, Java, or Ruby.
2. Familiarity with reinforcement learning or generative AI models.
3. Basic understanding of front-end and back-end development, including web frameworks and libraries (e.g., React, Angular, Node.js, Flask, Django).
4. Familiarity with Git and version control concepts.
5. Knowledge of CI/CD tools like Jenkins, Travis CI, GitLab CI/CD, or CircleCI.
6. Familiarity with Docker containers and container orchestration platforms like Kubernetes is a plus.
7. Awareness of security best practices in software development and DevOps.

O que oferecemos

Ready to take your career to the next level? The future of mobility isn't just anyone's job. Make it yours! **Join AUMOVIO. Own What's Next.**

Quem somos

Since its spin-off in September 2025 AUMOVIO continues the business of the former Continental group sector Automotive as an independent company. The technology and electronics company offers a wide-
