

Project Manager

Your tasks

Mission The Project Manager acts as entrepreneur for the project.

Tasks and responsibilities:

The Project Manager is responsible for the overall planning, execution, and closure of a project to develop and industrialize a product that meets (internal or external) stakeholder requests, within agreed budget, quality and timescale. He ensures proper communication and ensure information flow within the team and all project stakeholders. The Project Manager:

- manage airbag control unit (ACU) projects, of which the engineering leading location is in China, for the entire project life cycle according to Continental Automotive's project development rules.

- controls the profitability of the product according to the awarded conditions and the project approval.

- uses defined processes and methods to monitor, control and report project status and product maturity according to milestones (Gate Reviews).

- defines and implements appropriate countermeasures to contain risks and overcome issues

- manages change and problem resolution activities, including impacts to project timing, budget and risks.

About us

Since its spin-off in September 2025 AUMOVIO continues the business of the former Continental group sector Automotive as an independent company. The technology and electronics company offers a wide-ranging portfolio that makes mobility safe, exciting, connected, and autonomous. This includes sensor solutions, displays, braking and comfort systems as well as comprehensive expertise in software, architecture platforms, and assistance systems for software-defined vehicles. In the fiscal year 2024 the business areas, which now belong to AUMOVIO, generated sales of 19.6 billion Euro. The company is headquartered in Frankfurt, Germany and has about 87.000 employees in more than 100 locations worldwide.
