

Senior Full Stack Developer - VDO Fleet-TN_202511_041

Your tasks

About the Role

We are looking for an experienced **Full-Stack Developer (7-10 years)** who can contribute across both back-end and front-end development. This role is ideal for someone who has strong fundamentals in core Java, deep experience in Spring Boot microservices, and hands-on expertise in modern front-end frameworks like ReactJS or Angular. You should be comfortable working in a cloud-native environment and have solid experience with SQL/NoSQL databases.

As part of our team, you will collaborate closely with product owners, architects, front-end and back-end engineers to deliver scalable, secure, and high-performing features.

Key Responsibilities

- Develop, maintain, and enhance Java-based microservices built with Spring Boot.
- Build scalable and maintainable cloud-native applications.
- Develop responsive and interactive front-end applications using ReactJS or Angular.
- Write clean, maintainable, and reusable code across both back-end and front-end layers.
- Work with SQL(mssql), or NoSQL(mongoDB) databases to design efficient data structures and queries.
- Collaborate with the team to improve architecture, performance, and code quality.
- Troubleshoot, debug, and resolve complex technical issues.
- Participate in code reviews, sprint planning, estimations, and design discussions.

Your profile

Required Skills & Experience

Back-End Expertise

- Strong proficiency in Core Java.
- Deep experience with Spring Boot and micro-service architecture.
- Exposure to cloud-native development (Any of these: AWS, Azure, GCP or equivalent).
- Strong understanding of REST APIs, distributed systems, and service-to-service communication.
- Experience with SQL/NoSQL databases such as MongoDB, MySQL, PostgreSQL, etc.
- Strong debugging skills and ability to analyse logs to identify critical issues in large scale production environments.
- Fair knowledge of Docker, Kubernetes, or containerized

deployments.

- Experience with CI/CD tools (Jenkins, GitHub Actions, GitLab CI, etc.).

Front-End Expertise

- Strong experience in JavaScript and modern JS frameworks.
- Proficiency in ReactJS or Angular.
- Strong understanding of front-end design principles, state management, and responsive UI development.

General Requirements

- 7-10 years of relevant industry experience.
- Strong problem solving skills and a deep understanding of engineering best practices.
- Good communication skills and ability to work collaboratively with cross-functional teams.
- Ability to understand business requirements and translate them into technical solutions.

Our offer

Good to Have

- Experience in performance tuning and optimizing both UI and APIs.
- Good know how of Jira or similar project management tools, Git ecosystem, and version control best practices.
- Experience using tools like Datadog or equivalent for log analysis and monitoring.

About us

Since its spin-off in September 2025 AUMOVIO continues the business of the former Continental group sector Automotive as an independent company. The technology and electronics company offers a wide-ranging portfolio that makes mobility safe, exciting, connected, and autonomous. This includes sensor solutions, displays, braking and comfort systems as well as comprehensive expertise in software, architecture platforms, and assistance systems for software-defined vehicles. In the fiscal year 2024 the business areas, which now belong to AUMOVIO, generated sales of 19.6 billion Euro. The company is headquartered in Frankfurt, Germany and has about 87.000 employees in more than 100 locations worldwide.
