

Senior IT Engineer (IBM ELM/Jazz Platform)

Your tasks

As a Senior IT Engineer for IBM Jazz, you will be responsible for maintaining applications hosted in IBM ELM platform. You will support our worldwide distributed Research & Development (R&D) team in case of incidents and changes for our tool chains. You will be responsible for maintaining applications hosted in the IBM ELM platform.

Responsibilities:

- Administration and support of IBM ELM (Jazz) application like e.g. Doors Next Generation, Global Configuration, Report Builder etc.;
- Configuration and monitoring of databases to ensure backups, availability and performance are all maintained to the highest standards;
- Tuning, trouble shooting and on-call production support for database environments deployed in AWS environments both on the EC2 and RDS platforms;
- Monitor daily operational processes and take corrective action as necessary;
- Report weekly to management about abnormalities and critical issues; provide root cause analysis and recommendations; work with infrastructure team, application team and/or other teams for problem resolutions, following the escalation path if needed;
- Monitor and work on BMC ticket queue for request to make schema changes, execute scripts against the databases and refresh non-production databases.

About us

Since its spin-off in September 2025 AUMOVIO continues the business of the former Continental group sector Automotive as an independent company. The technology and electronics company offers a wide-ranging portfolio that makes mobility safe, exciting, connected, and autonomous. This includes sensor solutions, displays, braking and comfort systems as well as comprehensive expertise in software, architecture platforms, and assistance systems for software-defined vehicles. In the fiscal year 2024 the business areas, which now belong to AUMOVIO, generated sales of 19.6 billion Euro. The company is headquartered in Frankfurt, Germany and has about 87.000 employees in more than 100 locations worldwide.
