

Internship for Software Development – SAM (TM)

Your tasks

Passive Safety Software team is developing software for restraint system activation in case of road events. We save lives when there is nothing more that can be done to prevent an accident.

How are you and what are your future plans? We are looking for a passionate internship SW to join us.

As an internship in our group you can make your own contribution to the development of the SW for the next generation of airbag control units that will equip the new cars of all the major car manufacturers in the world.

Each engineer enjoys autonomy and has responsibility for his work, developing modules of the complex SW project from requirements analysis through design and coding, to integration and testing.

We offer the chance of being part of a very dynamic project team (involved in the development of a product for a specific car manufacturer), or our innovative-minded platform development team (developing the basic platform for tomorrow's products), or perhaps one of the so-called competence teams (specialists of their fields with world-wide competence within our company).

Your profile

- C programming language;
- University studies – in process of obtaining a Bachelor's/Master's Degree in a technical field (Computer Science, Informatics, etc.);
- Basic knowledge of embedded systems with real time constraints;
- Good English language skills.

Our offer

What we offer:

- Integration Program in a professional, young & dynamic team;
- A mentor for your learning period;
- Competitive Salaries & Benefits;
- Recommendation Bonuses for new team members;
- Flexible working hours for your studies.

Wellbeing:

- Health & Wellness (Private Health Insurance, Life Insurance, Sport activities etc.);
- Different discounts (glasses, tires, medical, shopping);
- In-house restaurant & coffee corners.

About us

Since its spin-off in September 2025 AUMOVIO continues the business of the former Continental group sector Automotive as an independent company. The technology and electronics company offers a wide-ranging portfolio that makes mobility safe, exciting, connected, and autonomous. This includes sensor solutions, displays, braking and comfort systems as well as comprehensive expertise in software, architecture platforms, and assistance systems for software-defined vehicles. In the fiscal year 2024 the business areas, which now belong to AUMOVIO, generated sales of 19.6 billion Euro. The company is headquartered in Frankfurt, Germany and has about 87.000 employees in more than 100 locations worldwide.
