

SQM SCS Senior IC Assembly Series Production (SP) Engineer

工作职责

Key Responsibilities

Advanced Electronics & Semiconductor Solutions (AESS)

Supplier Quality Management

- Develop, implement, and maintain a supplier quality management system for assembly process.
- Define and monitor KPIs, scorecards and quality performance targets for all assembly suppliers.
- Conduct periodic business and quality reviews with key partners to align expectations and improvement.

Compliance & Audits

- Plan & conduct VDA6.3 process audit & IATF16949 system audits at assembly suppliers
- Ensure full compliance with APQP, PPAP and customer specific automotive standards.
- Support qualification and approval of new suppliers and new assembly process.

Issue Resolution & Problem Solving.

- Lead root cause analysis and CA/PA(8D) for assembly related issues such as die attach defects, wire bond failures or package integrated issues.
- Monitor yield excursions and reliability test failures. Working with suppliers to implement robust correct actions.

New Process/Components Introduction

- Work with Technology & Operation Team to review & approve assembly process flows, control plan, PFMEA, PPAP and Change Notification.
- Support NPI and New Component Introduction Activities to ensure assembly suppliers are qualified for APQP/PPAP submissions and mass production readiness.

Continuous Improvement

- Drive suppliers towards zero-defect strategy, focusing on process capability(CP/CPK), poka-yoke, and mistake-proofing
- Benchmark and share best practices across the supply base to strengthen supplier competence.

Reporting & Documentation

- Maintain up-to-date audit records, PPAP packaging, supplier performance dash boards, and change control logs.
