AUMOVIO

AI Engineer

담당 업무

- Research and understand the principles and applications of Generative AI
- Develop AI Agents using LLM frameworks and Retrieval Augmented Generation (RAG) structures with tools such as Langflow/Langchain
- Build AI solutions using Python with common AI/ML/Automation libraries such as pandas, scikit-learn, PyTorch, FastAPI, selenium
- Support internal business workflows by identifying new automation opportunities
- Support currently implemented automation projects and workflows
- Build and maintain API pipelines (Flask, FastAPI)
- Support the assessment and integration of external AI software solutions to enhance business processes

지원자 프로필

- Master's degree in Computer Science, Data Science, or similar Engineering field
- At least 2 years of experience implementing AI and automation solutions (automotive or consumer electronics industry experience is a plus)
- Strong Python programming skills with software engineering focus
- Proficiency with Generative AI models, Agentic AI deployment, and RAG structures using tools such as Langflow/Langchain
- Knowledge of software engineering best practices, including version control (Git), testing, CI/CD, and containerization (Docker)
- Professional-level English and Portuguese language skills
- Passion for teamwork and collaboration in an international environment

처우 조건

Ready to take your career to the next level? The future of mobility isn't just anyone's job.   Make it yours!   **Join AUMOVIO. Own What's Next.**

기업 소개

Since its spin-off in September 2025 AUMOVIO continues the business of the former Continental group sector Automotive as an independent company. The technology and electronics company offers a wide-ranging portfolio that makes mobility safe, exciting, connected, and autonomous. This includes sensor solutions, displays, braking and comfort systems as well as comprehensive expertise in software,
