

New product launch manager acquisition

Your tasks

- Lead manufacturing related activities of complex industrialization projects within the Product Life Cycle, from acquisition until series production.
- Develop the Manufacturing Concept based on product architecture and requirements matching them to state-of-the-art production processes and technologies.
- Be responsible for completing activities within operations to meet the specific, cost, timing, and quality requirements.
- Be responsible for documentation of operations activities.
- Actively manage and optimize the use of resources in the project, and assign activities to the operations project team members.
- Coordinate and control project activities, track the project progress, and define corrective measures.
- Ensure spending and investments are aligned with approved authorizations and/or budgets.
- Ensure technical, timing, and cost feasibility to manufacturing processes to eventual changes in product or requirements and lead change management activities in production related to product or process.
- Promote continuous improvements for products, processes, and projects in your area of responsibility.
- Provide support in quality tasks to analyze, contain, and resolve issues during launch and serial production.
- Coordinate and manage prototype sample production activities.

Our offer

Ready to take your career to the next level and join us at the start of something extraordinary? Apply now to become a part of AUMOVIO and drive the future mobility together with us!

About us

Continental's Automotive group sector is expected to be listed as independent company "AUMOVIO" in September 2025. With ~93,000 employees worldwide and annual sales of ~€20 billion, we are entering an exciting new era.

AUMOVIO stands for highly developed electronic products and modern mobility solutions. In addition to its strong market position with innovative sensor solutions, displays, and technologically leading braking and comfort systems, AUMOVIO has significant expertise in software, architecture platforms and assistance systems for the rapidly growing future market of software-defined and autonomous vehicles. Our purpose is clear: to make future mobility safe, exciting, connected, and autonomous.
