Senior Supplier Quality Engineer

Feladatok

Overview

Responsible for leading supplier quality performance throughout the series production phase, ensuring customer satisfaction, driving continuous improvement initiatives, mentoring and leading supplier quality team. The role serves as a key supplier interface for quality-related matters, leads complex problem-solving activities, supports new product and facility launches, and drives the implementation of quality systems and best practices within the automotive manufacturing environment.

The expected annual salary range for this role is $75,000 - $97,000 a year depending on experience. This position is also eligible for a variable incentive program.

Core Responsibilities

Quality:

• Serve as the primary quality interface for key suppliers, leading quality reviews, customer and supplier visits, audits, APQP, PPAP approvals, warranty management, and escalation activities to ensure customer satisfaction and business continuity.
• Lead complex problem-solving and continuous improvement initiatives using A3, 8D, Six Sigma, 5-Why, 7-Step, and other structured methodologies. Drive cross-functional teams to identify root causes, implement corrective actions, and verify effectiveness.
• Establish and execute quality improvement strategies to achieve plant targets for Yield, DPMO, COPQ, PPM, customer complaints, and warranty performance. Monitor quality KPIs and provide regular reports to management.
• Lead validation and qualification activities for new components and suppliers. Review and approve test methods, validation plans, and reliability studies to ensure compliance with customer and automotive industry requirements.
• Drive supplier quality improvement activities, including supplier performance reviews, audits, corrective action management, and supplier development initiatives to ensure robust incoming quality
• Support and lead internal, customer, and third-party audits, ensuring compliance with IATF 16949, VDA 6.3, customer-specific requirements, and company quality management systems.

Problem-Solving:

• Works with Design Engineers and customer in early program stages to
