

IT DevOps Engineer for JIRA & Confluence

Your tasks

An IT DevOps Engineer for JIRA & Confluence is an IT generalist and specialist who should have a wide-ranging knowledge of both development and operations, including coding, infrastructure management, system administration, DevOps toolchains and ITSM topics like Incident Management and Problem Management. Working style is: 'Going beyond a single role'.

You will collaborate with development teams to design and implement efficient CI/CD pipelines that enable the rapid and reliable delivery of software applications and infra platforms with high quality and in a secure way.

You need to foster effective collaboration between development, operations, and QA teams. Act as a bridge between development and operations, ensuring smooth handover and knowledge sharing. Make sure understand customer needs, processes and value. Customer and DevOps needs to collaborate to design solutions and reach the same target (value of co-creation). Writing Software and Scripts to support Business Needs.

Your profile

- Atlassian JIRA and Confluence Administration Expert
- Experience with Atlassian Cloud is an advantage
- Experience in ITSM tools like BMC for Incident Management, Problem Management, Change Management
- Proficiency in scripting and/ or coding languages such as Python, Bash, or PowerShell etc.
- Experienced with configuration management tools and infrastructure-as-code (IaC) concepts.
- Familiarity with cloud platforms (e.g., AWS, Azure, GCP) and containerization technologies (e.g., Docker, Kubernetes).
- Experience with infrastructure provisioning and configuration management tools (e.g., Terraform, Ansible).
- Analytical mindset with the ability to identify and resolve complex technical issues.
- Proficiency in troubleshooting and debugging software applications, infrastructure components, and deployment processes.
- Excellent interpersonal and communication skills, with the ability to collaborate effectively with cross-functional teams.
- Strong documentation skills to create clear and concise technical documentation.
- Information & Cybersecurity Operations, Tools and Applications and how they fit into the DevOps cycle
- Bachelor's degree in Computer Science, Information Technology, or a related field (or equivalent work experience).
- At least 5 years professional experience as an IT DevOps Engineer.

About us

Since its spin-off in September 2025 AUMOVIO continues the business of the former Continental group sector Automotive as an independent company. The technology and electronics company offers a wide-ranging portfolio that makes mobility safe, exciting, connected, and autonomous. This includes sensor solutions, displays, braking and comfort systems as well as comprehensive expertise in software, architecture platforms, and assistance systems for software-defined vehicles. In the fiscal year 2024 the business areas, which now belong to AUMOVIO, generated sales of 19.6 billion Euro. The company is headquartered in Frankfurt, Germany and has about 87.000 employees in more than 100 locations worldwide.
