

Internship - PL Radar Base Projektmanagement - REF8306N

Descrição da função

Our Autonomous Mobility division is a key player in the automotive industry, focusing on partially and fully autonomous driving as well as various driver assistance systems. To enable autonomous vehicles, we rely on state of the art sensor technologies such as radar.

We offer you a diverse, responsible, and future oriented internship.

Your Tasks:

- Take an active role in coordinating and tracking project activities, including planning, task tracking and status reporting
- Track, analyze and visualize KPIs and project performance metrics to support data driven decision making
- Prepare presentations, reports and structured documentation for internal stakeholders and management
- Identify process improvement opportunities and support the implementation of optimization measures
- Collaborate with international, cross functional teams to provide operational support in a dynamic project environment

Requisitos

Job requirements:

- Student (m/f/diverse) in Industrial Engineering, Business, Automotive Engineering, or a comparable field
- Experience with collaboration and data analysis tools such as Confluence, Power BI, and Jira is a plus
- Very good command of MS Office, especially Excel and PowerPoint
- Strong interest in project management, data analysis, and mobility technologies
- Strong communication skills and ability to work in an international team
- Structured, proactive, and ownership driven working style
- Fluent English- and very good German skills are absolutely essential for us

Before you submit your application, there are a few things you should keep in mind: We need your **current enrollment certificate** and your **latest transcript of records**.

If you are **not** from an EU country, please also send us your **valid residence permit and your work permit including a supplementary sheet**.

Applications from severely disabled people are welcome.

Quem somos

Since its spin-off in September 2025 AUMOVIO continues the business of the former Continental group sector Automotive as an independent company. The technology and electronics company offers a wide-ranging portfolio that makes mobility safe, exciting, connected, and autonomous. This includes sensor solutions, displays, braking and comfort systems as well as comprehensive expertise in software, architecture platforms, and assistance systems for software-defined vehicles. In the fiscal year 2024 the business areas, which now belong to AUMOVIO, generated sales of 19.6 billion Euro. The company is headquartered in Frankfurt, Germany and has about 87.000 employees in more than 100 locations worldwide.
