

RD Validation Engineer

หน้าที่ความรับผิดชอบในงานของคุณ

The Validation Manager is responsible to synchronize and track all test activities in a project based on an overall test planning. He achieves this target by respecting the following boundary conditions: There shall be a single test plan for the project which includes the test strategy for the complete project. There shall be a project test schedule which shall be permanently synchronized with the discipline test schedules. The overall test process - including DV and PV - is monitored, inconsistencies or deviations from the planning are escalated to the Project Manager.
