

Mechanical Engineer

หน้าที่ความรับผิดชอบในงานของคุณ

- Responsible for the mechanical design and development of automotive products.
- Review technical specifications to establish new projects or modifications.
- Solid knowledge in the design and evaluation of plastic and stamped components.
- Ensure that the design meets design parameters and customer requirements.
- Prepare and maintain the Bill of Materials (BOM).
- Evaluate assembly feasibility, dimensional accuracy, and appearance of parts, subassemblies, and the final product.
- Develop and maintain technical procedures, documentation, and manuals.
- Solid knowledge in interpreting structural, thermal, and plastic injection simulations to make appropriate design adjustments.
- Collaborate as a project team member, being responsible for mechanical design-related topics, identifying issues and providing appropriate solutions to ensure quality and timely deliveries.
- Plan and coordinate continuous improvement activities to enhance and strengthen team development.

โปรไฟล์ของคุณ

- Bachelor's degree in Mechanical or Mechatronics Engineering.
- Solid knowledge in Product Development, Problem Solving, and Engineering Change Processes.
- Proficiency in technical report writing and presentation skills.
- Strong drive for continuous improvement and enthusiasm for learning new things.
- Excellent attention to detail.
- Preferably with experience in automotive design projects.
- Experience with CAD tools and simulation software.
