

ASC_EBS Test Engineer

Your tasks

In the development of electric brake components. This role involves installing developing proto products in vehicles, conducting actual test drives, and collaborating with customers to develop control performance.

The job responsibilities will include not only control performance but also verifying the system's behavior in the event of a malfunction and evaluating whether vehicle safety is ensured.

This role offers high motivation, as you will be working daily to minimize accidents by developing safety-related products while experiencing the dynamic movements of automobiles.

Your profile

1. More than 3 years of engineering experience in Automotive area.
2. English speaking skill (need to handle English meeting and overseas business trip alone)
3. Driving license for 4 wheels and 2 wheels
