

## Embedded AI Engineering Intern [IDA:00021]

### Tus actividades

We are seeking a highly motivated Embedded Resilient AI Engineer Intern to support the evaluation, optimization, and deployment of AI models on resource-constrained embedded platforms, including FPGA-based systems and state-of-the-art microcontrollers (MCUs).

The intern will work at the intersection of AI performance evaluation, embedded system design, and hardware-aware AI optimization, with a strong emphasis on robustness, efficiency, and deployability for automotive embedded use cases.

1. Evaluate performance of common AI/ML models under embedded constraints (latency, memory, power, accuracy).
2. Propose and implement embedded AI solutions suitable for FPGA or MCU platforms
3. Deploy and benchmark AI inference on FPGA-based systems and/or up-to-date MCUs.
4. Analyze trade-offs between different hardware platforms and optimization approaches.
5. Document results and provide clear technical summaries.

### Tu perfil

1. Bachelor's or Master's student in Electrical Engineering, Computer Engineering, Computer Science, or related field.
2. Programming experience in C/C++; Python is a plus.
3. Basic understanding of machine learning and embedded systems. Interest or exposure to FPGA or MCU-based AI acceleration.
4. Strong analytical and documentation skills.

### Acerca de nosotros

Since its spin-off in September 2025 AUMOVIO continues the business of the former Continental group sector Automotive as an independent company. The technology and electronics company offers a wide-ranging portfolio that makes mobility safe, exciting, connected, and autonomous. This includes sensor solutions, displays, braking and comfort systems as well as comprehensive expertise in software,
