

Category Manager IT Infrastructure (m/f/diverse) - REF86049P

Náplň práce

Joining as **Category Manager IT Infrastructure (Datacenter, Cloud & Operations)** within the respective Automotive Purchasing Group, by providing Continental with expertise and best practices in the fields of **IT Strategic Sourcing, Supply Market Analysis and Category Management**.

The role includes the following activities and responsibilities:

- Conducting global tenders and negotiating delivery terms (quality, quantities, prices, deadlines, logistics)
- Responsibility for decisions regarding the award of business to suppliers
- Concluding contracts, also according to foreign and international law in cooperation with the respective legal department
- Implementation of contracts (communication and project management);
- Ensuring the supply of required goods and services in quality and time
- Ensuring compliance with Purchasing Policies, Business Partner Code of Conduct, Continental Basics, Continental Code of Conduct and all Group Guidelines
- Ensuring customer centricity through understanding customers' expectations, needs, and wishes while building a strong Global Category network with your customer and other participants
- Definition of the supplier strategy in cooperation with the specialist departments
- Analysis of the procurement markets regarding trends and innovations
- Monitoring supplier performance in terms of quality, delivery reliability and financial stability
- Determination of requirements, clarification with the specialist departments and pooling across locations, organizations, and countries.

O nás

Continental's Automotive group sector is expected to be listed as independent company "AUMOVIO" in September 2025. With ~93,000 employees worldwide and annual sales of ~€20 billion, we are entering an exciting new era.

AUMOVIO stands for highly developed electronic products and modern mobility solutions. In addition to its strong market position with innovative sensor solutions, displays, and technologically leading braking and comfort systems, AUMOVIO has significant expertise in software, architecture platforms and assistance systems for the rapidly growing future market of software-defined and autonomous vehicles. Our purpose is clear: to make future mobility safe, exciting, connected, and autonomous.
