

Technical On-site Resident Engineer

Your tasks

Core Responsibilities:

- On-site customer coordination of all regional technical topics.
- Lead on-site Customer Technical Issues Tracking meetings.
- Reproduce issues reported by the customer and support root cause analysis.
- Assist in the collection of data and technical trouble shooting through initial analysis and data acquisition of anomalies or performance gaps.
- Documentation of open issues related to customer development, customer meeting minutes, and support driving open issues to closure.
- Primary interface between Continental and Customer change control databases
- Coordination of prototypes including scheduling, preparation, shipping, tracking, and invoicing
- Interface with customer databases and systems
- Contribute to spread the troubleshooting knowledge with other disciplines and residents.

Additional Responsibilities:

- Primary interface to customer requirements
- Tracking and communication of customer milestones or updates to customer timing cards
- Technical trouble shooting through initial analysis and data acquisition of anomalies or performance gaps.
- Support Project Management for Technical approvals with the Customer
- Provide critical timing or technical feedback to Project Team members.
- Oversee Customer Vehicle development needs and interfaces with Continental Project Teams (builds, retrofits, reflashing, etc...)

Your profile

WHAT YOU BRING TO THE ROLE

- Bachelor's degree in Engineering.
- Good knowledge and understanding of mechanical or electronic systems, with the ability to analyze technical problems.
- Proficient in using computers (MS Office), and various application specific automotive and engineering test equipment.
- Proficient in English. Strong written and verbal communication skills, with the ability to clearly and concisely convey technical information to remote engineering teams.
- Strong interpersonal skills and a collaborative mindset suited for international teamwork.
