

Data Engineer & Digital Transformation Developer (m/f/d)

工作职责

What You'll Work On:

- You will be part of an international IT team of data engineers & digital transformation developers, utilizing the latest Cloud based data Lakehouse platforms to harmonize and enrich AUMOVIO data as basis for analysis, reporting and AI. Within the scope of all Automotive, you will collaborate on projects with cross-functional teams and specialists from business and IT side.
- You will create and maintain automated data pipelines from various sources and business domains and bring them into a uniform layout (pure SQL driven). This includes the underlying data modeling, transformation and preparation of the data to be the basis for data analysis, reporting and AI use cases.
- You will be responsible for reliable maintaining of data (storage format, data availability & data integrity) including following Cybersecurity and IT security standards.
- You will make sure your ETL pipelines are continuously monitored and optimized to keep as reliable, fast and efficient as possible.
- Show interest in current developments as well as trends and market developments in Data Engineering and DevOps by staying up to date with recent methodologies, incorporating them into daily work.
- Share your knowledge with the community via training and consulting.

职位要求

- Master's degree in computer science, applied mathematics, machine learning or similar
- At least 5 years of experience as Data Engineer and/or DevOps and/or DataOps
- Proven expert practical experience with SQL, Python, GIT and PowerBI
- Very good command of English (both written and spoken)
- Very good communication skills
- Expert in building robust and automated data pipelines with ETL tools
- Expert in analyzing requirements and processes in order to design solutions based on them
- Practical knowledge of data warehouse concepts and solutions (like Databricks or Redshift)
- Experience of PowerBI reporting is a plus
- Experience of backend and DevOps technologies such as Docker, KubeFlow is a plus
- Practical experience working with Amazon Web Services (AWS) technologies is a plus
- Understanding of basic Data Science workloads and requirements
- Very good quick comprehension
- Analytical, structured and conceptually strong working methodology

关于我们

Since its spin-off in September 2025 AUMOVIO continues the business of the former Continental group sector Automotive as an independent company. The technology and electronics company offers a wide-ranging portfolio that makes mobility safe, exciting, connected, and autonomous. This includes sensor solutions, displays, braking and comfort systems as well as comprehensive expertise in software, architecture platforms, and assistance systems for software-defined vehicles. In the fiscal year 2024 the business areas, which now belong to AUMOVIO, generated sales of 19.6 billion Euro. The company is headquartered in Frankfurt, Germany and has about 87.000 employees in more than 100 locations worldwide.
