

Technical Internship at AUMOVIO (TM)

Feladatok

We are looking for motivated and curious **Technical Students** to join our technical teams. This internship provides students with hands-on experience in a professional environment, allowing them to apply academic knowledge to real-world technical challenges while learning industry practices, tools, and methodologies.

Internships may be involved in activities related to **software development, hardware design, system engineering, IT roles, mechanical engineering, testing, validation, or technical support**, depending on their background, need and team assignment.

Selection & Recruitment Process

The internship selection process typically includes:

1. **Application Submission***;
2. **Initial Screening** - Review of academic background and alignment with available roles;
3. **Interview** - Technical and/or HR discussion to assess motivation, basic knowledge, and learning potential;
4. **Final Evaluation.**

*Please note that your application will be retained in our candidate database, and you may be contacted at a later stage once a suitable opportunity matching your profile becomes available. As a result, the response time may vary.

Key Responsibilities

Depending on the assigned team and domain, responsibilities may include:

- Supporting day-to-day technical activities within the assigned department;
- Assisting in the design, development, testing, or maintenance of systems, applications, or components;
- Writing, reviewing, or maintaining technical documentation;
- Participating in testing, troubleshooting, and debugging activities;
- Collecting and analyzing technical data and reporting findings;
- Collaborating with engineers, developers, and technical specialists;
- Following established processes, quality standards, and safety guidelines;
- Actively participating in team meetings, reviews, and learning sessions.

Rólunk

Since its spin-off in September 2025 AUMOVIO continues the business of the former Continental group sector Automotive as an independent company. The technology and electronics company offers a wide-ranging portfolio that makes mobility safe, exciting, connected, and autonomous. This includes sensor solutions, displays, braking and comfort systems as well as comprehensive expertise in software, architecture platforms, and assistance systems for software-defined vehicles. In the fiscal year 2024 the business areas, which now belong to AUMOVIO, generated sales of 19.6 billion Euro. The company is headquartered in Frankfurt, Germany and has about 87.000 employees in more than 100 locations worldwide.
