

Visual Communication & Motion Design Intern [IDA: 00030]

Jūsų užduotys

There are 13 automotive-related corporate lab projects covering in-cabin sensors, AI, and security solutions. The design intern will be responsible for developing creative concepts, storyboards, and producing a one-minute highlight video for each project to effectively communicate the key value and innovation behind each solution. This includes video editing, motion graphics creation, visual transitions, sound integration, and ensuring a consistent storytelling style across all project videos.

The intern should have strong storytelling ability, a good sense of visual communication, and proficiency in motion graphics and animation tools such as After Effects. The role also requires creativity in presenting technical content in a simple, engaging, and audience-friendly manner.

In addition, the intern will be tasked with designing a creative brochure to showcase all 13 projects in an exciting and professional way. The brochure should include QR codes linking to detailed project information, videos, or interactive web content. Ideally, the brochure should also serve as a memorable souvenir that visitors would want to keep, such as a foldable design that can be transformed into a phone holder or other useful item.

The intern may also support branding visuals, exhibition materials, presentation assets, and digital media content related to the projects where required.

Reikalavimai

- Proficiency in Adobe After Effects
- Proficiency in Adobe Premiere Pro
- Proficiency in Adobe Illustrator
- Proficiency in Adobe Photoshop
- Strong storytelling and motion graphics skills

AUMOVIO Singapore Pte. Ltd.

Apie mus

Since its spin-off in September 2025 AUMOVIO continues the business of the former Continental group sector Automotive as an independent company. The technology and electronics company offers a wide-ranging portfolio that makes mobility safe, exciting, connected, and autonomous. This includes sensor solutions, displays, braking and comfort systems as well as comprehensive expertise in software, architecture platforms, and assistance systems for software-defined vehicles. In the fiscal year 2024 the business areas, which now belong to AUMOVIO, generated sales of 19.6 billion Euro. The company is headquartered in Frankfurt, Germany and has about 87.000 employees in more than 100 locations worldwide.
